Education

B.Tech in Information Technology , NIT Jalandhar	2023–2027
Higher Secondary Education , Amity International School, Noida, Uttar Pradesh	2023
Percentage: 93%	

Experience

Software Engineering Trainee – Intern <i>Vitana Private Limited, New Delhi (Remote)</i>	<i>June 2025 – July 2025</i>
- Contributed to the frontend development of a mental wellness platform featuring 4+ user-facing modules including journaling, AI chatbot interactions, recommendations, and wellness tools. - Developed reusable React.js components and responsive user interfaces, improving maintainability and enabling faster feature development across application modules. - Integrated 10+ RESTful API endpoints and implemented asynchronous data handling to support seamless communication between frontend interfaces and backend services.	

Projects

CAF-MAI (Unbiased AI) – FastAPI, React.js, Scikit-learn, Gemini AI	Source Code
- Architected and deployed a FastAPI + React Responsible AI platform with an 11-module ML pipeline for data profiling, bias discovery, model training, fairness evaluation, explainable AI, and model monitoring. - Developed fairness auditing and debiasing modules for automated bias detection, subgroup analysis, and AI model evaluation. - Engineered a debiasing framework using sample reweighing, probability adjustment and Gemini API integration, achieving 15–35% reduction in bias disparities.	
MENTALAI (Mental Wellness Platform) – React.js, Express.js, MongoDB, GeminiAI	Source Code
- Developed a full-stack mental wellness platform featuring 5+ user-facing modules, including journaling, mood analytics, AI-powered chat assistance, personalized recommendations, and wellness engagement tools. - Engineered a recommendation system delivering personalized content across 5 recommendation categories by leveraging mood trends, user interests, interaction history, and recency-based scoring. - Implemented 15+ RESTful API endpoints, JWT-based authentication, Gemini AI integration, and MongoDB-backed data management to support personalized experiences and recommendation tracking.	
LinkShrink Pro – Node.js, Express.js, MongoDB, NanoID	Source Code
- Developed a URL shortening application using Node.js, Express.js, and MongoDB, enabling efficient generation and management of shortened links. - Engineered 8-character NanoID-based URL generation supporting over 2.8×10^{14} unique combinations while minimizing collision probability. - Implemented URL redirection workflows and validated RESTful APIs for concurrent URL creation and retrieval operations with a 99% success rate.	

Technical Skills

Languages: C, C++, Java, Python, JavaScript, TypeScript, HTML/CSS, SQL (MySQL)
ML Libraries: NumPy, Pandas, Scikit-learn, PyTorch, LightGBM, Matplotlib, Seaborn
Tools: Git, GitHub, Postman, Docker, VS Code, IntelliJ IDEA, Jupyter Notebook, Google Colab
Technologies & Frameworks: React.js, Node.js, Express.js, FastAPI, REST APIs, JWT Authentication, MongoDB, MySQL, AWS, Linux
Coursework: DSA, OOP, DBMS, Operating Systems, Computer Networks, System Design

Achievements

• Top-100, Ethereum IV Quant Forecasting Competition	2026	• Solved 500+ DSA Problems (LeetCode & GeeksforGeeks)	
• Top-50, Magicpin Vera AI Challenge	2026	• AIR 15120, JEE Main	2023
• Meta AI Hackathon Finalist (Top 200)	2026	• AIR 16380, JEE Advanced	2023
